Issued: January 2, 2017 / Page 1 of 3

Our year online

Scammers live online, operate online, and try to hide online. We're also online to make their lives a living hell, and to expose their operation and hiding places.

Notes worth noting

- Compared to 2015, we've noticed in 2016:
 - 15% DECREASE in NEW SCAMMERS' IDs** (55/month, 660 in the year);
 - 29% DECREASE in their NEW EMAILS** (160/month, 1,920 in the year); NOT all emails listed are related to CV theft scams.
 - 95% (about) of the fake CVs circulated were just recycled, i.e., came from known names and emails.**
 - 11% INCREASE of UNIQUE VISITORS TO OUR WEBSITE** (11% increase in the daily average);
 - 10% INCREASE of FIRST TIME VISITORS TO OUR WEBSITE** (9% increase in the daily average);
 - 14% INCREASE of RETURNING VISITORS TO OUR WEBSITE** (13% increase in the daily average).
- The moderate increases in UNIQUE and FIRST TIME VISITORS are fully expectable, as our website, now in its 5th year of operation, is well known within the Translation Community. The solid numbers of RETURNING VISITORS (+14%) are a clear proof of it.
- On Twitter, we continue to aggressively block spammers, free riders, non-identified "eggs", gratuitous namers and shamers and those with protected tweets.

So, is this exposure of scammers working?

Clearly, yes. And, as long as genuine translators and companies do not fuel the scammers' "business", it's going to work even more. Look at this as fishing, with us being the fish: as long as we know what to look for, scammers will reel in nothing, no matter how many times they cast their scamming lures at us.

Acknowledgments

Our work and this Report were made possible thanks to the support and collaboration of the many independent translators and translation companies who tirelessly have shared with us data, emails, fake CVs and other documents circulated by scammers. You know who you are and without your dedication, scammers would have a much easier life.
